Dear Emory,

10/27/80

Thanks for the thoughtfulness of the stamped envelope. I'm much more limited in what I can do an anything that saves me any time or effort is helpful.

I was aware od the conjectural HQ record suggesting that the M-C ammo was made for the CIA, but I always had some trouble with that. In part because the CIA would have wished M-C's on their enemies only.

Tatro was in touch with me. He wrote me again while I was back in the hospital but I've not gotten to that stack yet. I did read what he sent. I don't think I can add anything to the little I'd suggested earlier.

In those days everyone in the FBI was bucking for brownie points by coming up with something against the SBA and the Lab was no different.

All the top brass got the conjecture, too.

I'll be surprised if a) there is anything to it and b) in the remote event there is, if it has any significance.

I'm not aware of any other pertinent records but Hoch would be a good one to ask.

Best wishes,
